

# Women With HIV

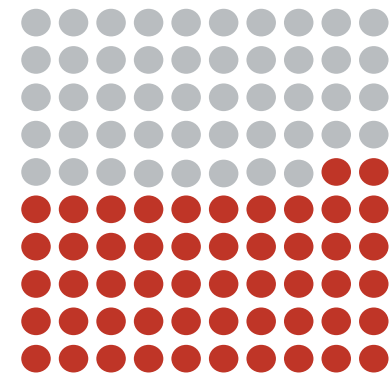

When compared to all people with HIV, women have about the same viral suppression rates. For **every 100 women with HIV in 2018**:\*

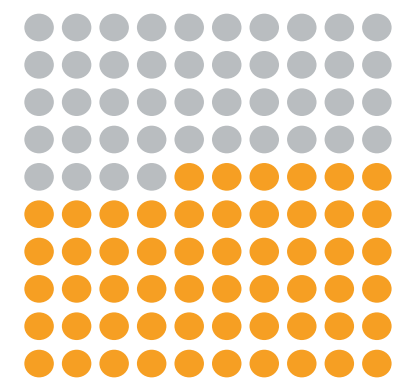

**90**  
received  
an HIV  
diagnosis

**68**  
received  
some  
HIV care

**52**  
were  
retained  
in care

**56**  
were virally  
suppressed

For comparison, for every **100 people overall** with HIV,  
**86 received an HIV diagnosis**, **65 received some HIV care**, **50 were retained in care**, and **56 were virally suppressed**.

\* Includes people with diagnosed or undiagnosed HIV.
